[Docket Number FRA-2013-0120]

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated January 17, 2013, Railserve, Inc. (RASX) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 223, Safety Glazing Standards—Locomotives, Passenger Cars and Cabooses. FRA assigned the petition Docket Number FRA-2013-0120.

RASX of Atlanta, GA, petitioned for a waiver of compliance for one locomotive from the requirements of 49 CFR 223.11, *Requirements for existing locomotives*, which require certified glazing in all windows. The reporting mark on this locomotive is RASX 169. This locomotive is used in switching operations inside the Chevron Plant in Port Arthur, TX. The switching operations involved interchange with the Norfolk Southern Railway for inbound and outbound cars on general system railroad trackage that is less than one-half of a mile long. RASX stated that there is no history of vandalism at the Chevron Port Arthur, TX, plant and that the locomotive is parked inside the plant when not in use. The top speed of operations is 5 mph. RASX also stated that to install glass that meets FRA specifications would be cost prohibitive.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's Docket Operations Facility, 1200 New Jersey Avenue, S.E., W12-140, Washington, D.C. 20590.
